LAWN GRASS SEED

One of our Specialties, and here's where we are strong

The mixing and blending of grasses has long been one of our hobbies, and our past practical experience and careful study of the various kinds has enabled us to produce such mixtures as, for their specific purposes, are giving the best of satisfaction. These facts, together with a positive statement that we use in our mixtures of Lawn Grass absolutely none but the very best of clean, high-grade grass seed, we hope will convince you that our "Rex," "Golf and Tennis" and other mixtures will give you the results you are looking for.

OUR "REX" BRAND of Lawn Grass is a perfect blend, consisting of a number of high-grade grasses most suitable for the purpose, which will stand the close cutting, extremes of weather and other adverse conditions which ordinary lawns have to endure. It contains grasses giving quick but permanent results, as well as others slower in growth with

heavy root action, making, under favorable conditions, a strong, beautiful, green sod. This brand weighs about twenty-two pounds per measured bushel. Following are the prices per measured quantities: Quart 30c. 2 quarts 55c. 3 quarts 80c. $\frac{1}{2}$ peck \$1.00. peck \$1.75. $\frac{1}{2}$ bu. \$3.25. 1 bu. \$6.50.

BRAINARD'S "SHADY CORNER GRASS"

This mixture of grasses has helped to solve many such questions as "What can I do with that bare, unsightly spot?" It is difficult to establish a good turf in a dense shade with any grass, but in ordinary shaded places this mixture, composed of dwarf-growing, strong-rooting grasses which thrive in sheltered and shaded locations, will make a quick showing and gradually build a strong, green turf. This mixture weighs about twenty pounds per measured bushel and is sold per measured quantity as follows: Quart 35c. 2 quarts 65c. 3 quarts 90c. $\frac{1}{2}$ peck \$1.15. peck \$2.00. $\frac{1}{2}$ bu. \$4.00. 1 bu. \$7.75.
